### **Activity report on initiatives regarding clean and green campus:**

The college commits itself to the maintenance of a clean and green environment through various measures where a seamless fusion of aestheticism and eco-responsible behaviours is upheld. The limited space of the college premises is strategically used by nurturing potted and wall-mounted plants that are kept at several nooks and crannies, maintained regularly with utmost love. Moreover, the college organises several plantation programs to foster awareness regarding the necessity of afforestation in the current climate scenario and walks the talk in the various academic and non-academic events by offering potted plants to guests as tokens of gratitude and reaffirmation to the aforementioned task at hand.

Furthermore, the college is serious about the maintenance of a clean environment and each and every member of the teaching and non-teaching staff plays their role in that. From regular sweeping of the premises to the strategic placement of garbage bins promoting and modifying behaviour regarding cleanliness amongst the students, the college does its part with sincerity. In accordance with the necessity of the times, the college works towards achieving a plastic-free environment, a challenge that has to be faced head on in a world that's ever so dwindling into the dependence of the material, taking care of the sorting of dry & wet and degradable & non-degradable waste products. Afterwards, the waste is disposed of with the help of the ever-committed Kolkata Municipal Corporation. The college also partakes in the mission of e-waste management by employing a reputed organisation.
