Educational research refers to the systematic collection and analysis of data related to the field of education. Research may involve a variety of methods and various aspects of education including student learning, interaction, teaching methods, teacher training, and classroom dynamics. A conceptual framework is a representation of the relationship we expect to see between our variables, or the characteristics or properties that we want to study. Conceptual frameworks can be written or visual and are generally developed based on a literature review of existing studies about our topic. Dr. Nath explain the topic very distinctly and in an easy format .

Student decorated the room with poster made by them on the topic and with flowers. Anchoring- done by Dr. Deblina Talukdar. Introducing Speaker and departmental speech given by Joyita Mitra. The Vote of thanks was given by Bapi Das.
